

## 1. Progress update

---

TransGrid understands that a face to face CCC meeting is not permissible under government restrictions imposed due to the current corona virus pandemic.

We trust that all CCC members and their families are coping well during this difficult time.

TransGrid has provided information to the Chairman of the CCC, Mr Nic Carmody, in response to questions raised from the last CCC meeting. We understand that the Chair has forwarded these to CCC members.

These responses included measures to address legacy issues raised.

Since that time TransGrid has resolved legacy issues directly with landowners.

In respect of the Review of Environmental Factors, a draft submissions report has been prepared and this is currently being reviewed as part of the assessment process.

TransGrid is now awaiting advice on the REF approval and will contact the CCC Chair when this is finalised.

Any further questions can be emailed to:
